

IH-35 Travel Stop

San Antonio, TX

Architect: Charles Gates Arhitect

General Contractor: .

Other Contractors: S&S Plumbing

PROJECT DESCRIPTION

The IH-35 Travel stop is a large travel stop south of San Antonio serving hundreds of patrons daily. The project consists of a 18,000 gallon above-ground water tank filled from a 1,500 gallon cistern. This particular system flow through a 40 GPM UV water treatment system by Water Control. The make-up water comes from condensate from all the ice-makers and air conditioning systems from the storefront. All water is sent to the irrigation system.
